SUMMARY

Diligent Computer Science student eager to apply my skills and enthusiasm to advance a company's mission. Technically adept with a positive attitude, strong work ethic, and a drive to learn new tools and technologies. Actively seeking an internship opportunity to grow professionally and contribute meaningfully.

SKILLS

Languages: Python, Java, JavaScript, C++

Frameworks: MERN Stack (MongoDB, Express, React, Node.js), TensorFlow, Keras, Scikit-learn

Databases: MySQL, MongoDB

Tools & IDEs: Eclipse, NetBeans, VS Code, Git, GitHub, Google Colab, Kaggle

ML Skills: Transfer Learning, Data Augmentation, Model Deployment

Core CS: OOP, DSA, DBMS

Soft Skills: Problem Solving, Public Speaking, Team Collaboration

EDUCATION

Bachelor of Computer Science

Sukkur IBA University Sukkur | 2022 - 2026 (Expected)

- CGPA: 3.30/4.0

PROJECTS

Quiz Flashcards App (*MERN Stack*) — July 2025

- Built a responsive full-stack learning platform (React, Node.js, Express, MongoDB) offering dynamic quizzes and flashcards across selectable topics.
- Integrated secure JWT authentication, user progress tracking, quiz review system, and a leaderboard for performance comparison with persistent storage.
- Developed an admin dashboard to manage users, quizzes, flashcards, and topics with full CRUD operations and account control.

Skin Lesion Classifier (*Deep Learning*) — April 2025

- Developed a CNN-based skin lesion classification model trained on HAM10000 dataset.
- Implemented image augmentation, batch normalization, and dropout for improved performance.
- Deployed an interactive Gradio app for real-time image uploads and classification.

Book Store App (*Java, JDBC, MySQL*) — November 2023

- Built a console-based book store management system using Java with JDBC and MySQL for relational data storage.
- Implemented user and admin modules for registration, login, book browsing, cart management, and order processing.
- Applied DBMS concepts like CRUD operations and transactions; ensured secure, role-based access for efficient inventory and order management.

AI Chatbot (*Java, OpenAI API, MySQL*) — May 2022

- Developed a command-line AI chatbot in Java integrating OpenAI's GPT API for intelligent, real-time responses.
- Connected to a MySQL database via JDBC to store and retrieve conversation history dynamically.
- Implemented input validation, error handling, and conversational flow for context-aware, engaging user interactions.
